Description

24RLS Rear Living Room w/Slide-Out Dinette

The 24RLS by Braxton Creek is a great floor plan for the empty nesters ready to get away for a long weekend or longer. With the deep 36 inch slide out room the dinette is moved to the side to open the living area for added comfort and floor space. The large kitchen countertop provides lots of space for preparing a great meal or a convenient space for setting a great buffet! With all the necessary appliances just like home, anything is possible! The recessed refrigerator holds a great cache of food and at easy reach for preparation. The ample, complete bathroom has dual access from the living area as well as the bedroom. The queen bedroom offers a great place for a good night sleep or that afternoon nap following a big lunch. The large tinted windows open easily for fresh air and provide the great view of the camping area.

On the outside, the electric awning easy opens to expand the living space and offer the comfort of shade and protection from rain. The large pass thru storage compartment easily stows away the fishing poles and other items not needed inside the camper. Finally, the outside hot & cold shower faucets get the water just right to wash the dog or clean up after cleaning the fish. More features, great quality and great looks, Braxton Creek has every detail covered.
